# Recruit CRM Company Page Redesign Case Study

To redesign the Company Page in Recruit CRM to improve usability, reduce visual clutter, and enable recruiters to manage jobs, tasks, and candidates more efficiently

BY - HIMANSHU MATLOTIA

# Pain Point Summary

- **Distracting Top Bar**
  Unrelated buttons like “Book a Demo” and “Upgrade Account” distracted from core workflow

- **Unhelpful Empty State in Right Panel**
  Empty state didn’t guide users toward taking actions, making it unclear what to do next.

- **Cluttered Company Info Section**
  Many empty fields shown by default, creating visual clutter.

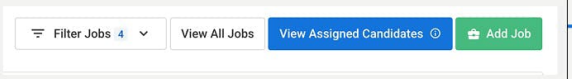

- **Hard-to-Find Action Buttons**
  Important actions like “Add Job” and “View Assigned Candidates” were not prominent enough

.

# Pain Point 1 : Top Bar Buttons Reorganized for Better Workflow Hierarchy

**Old**

Top bar buttons styled like primary workflow actions, causing visual confusion.

"+ " button functionality unclear until hover.

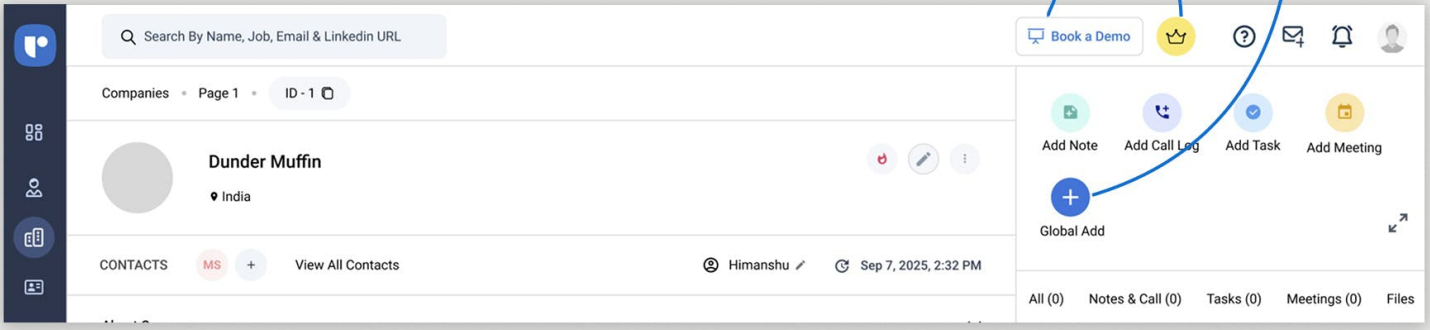

# Pain Point 1 : Top Bar Buttons Reorganized for Better Workflow Hierarchy

NEW

"Upgrade to Premium" button circular gold with crown icon, distinct from workflow actions.

"Global Add" button clearly visible and accessible for recruiter workflow.

"Book a Demo" buttton in neutral color to de-prioritize

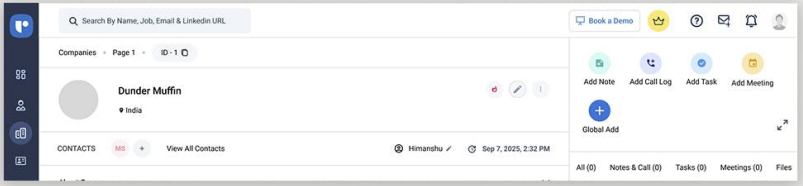

## Old

### Old Design Problems:

- Buttons like “Book a Demo” and “Upgrade Your Account” looked like primary workflow actions.
- “+ Global Add” button functionality was unclear.

### New Design Improvements:

- “Book a Demo” de-prioritized with neutral color.
- “Upgrade to Premium” highlighted as circular gold with crown icon.
- “+ Add New” now clearly visible and accessible.

**IMPACT:**

- Clear visual hierarchy guides recruiters to key actions.
- Secondary options remain visible but not distracting.

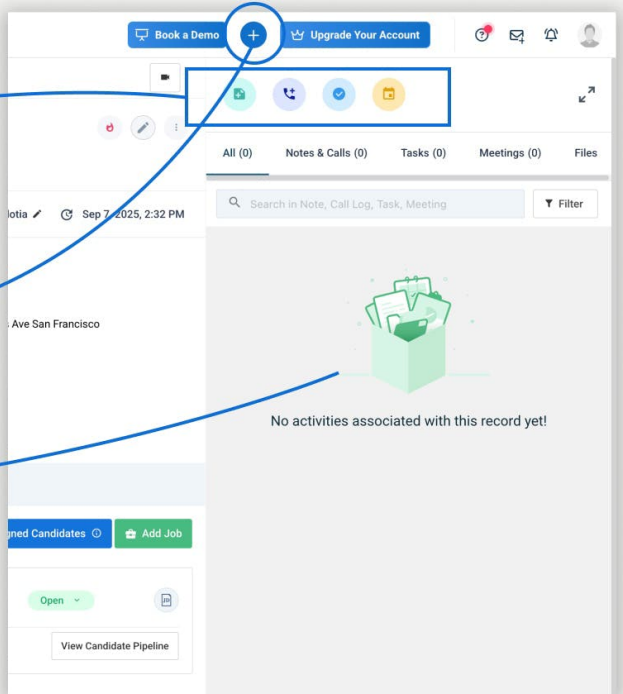

# Pain Point 2: Unhelpful Empty State & Unclear Action Buttons

Old

Action buttons (Add Task, Add Call, Add Meeting) were icon-only and labels showed only on hover, making them unclear.

Global “+ Add New” button in top bar was crowded and separated from related actions.

Right panel empty state: “No activities associated with this record yet!” → users unsure what to do next, causing confusion.

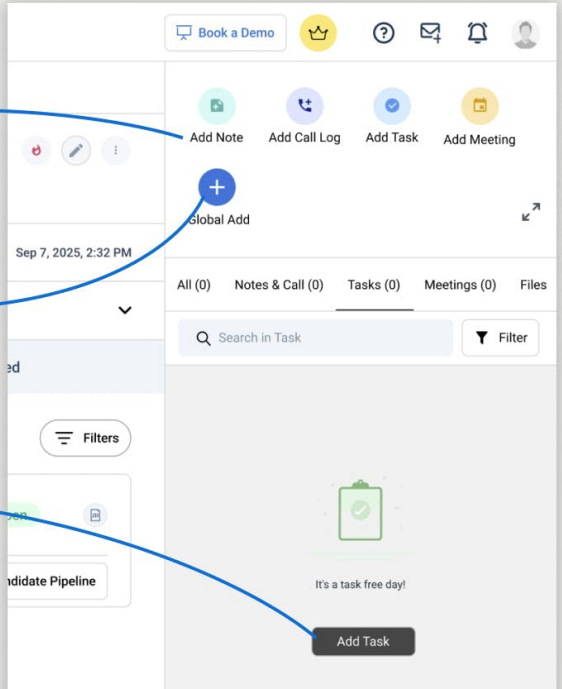

# Pain Point 2: Unhelpful Empty State & Unclear Action Buttons

NEW

Buttons now always show labels: “Add Task”, “Add Call Log”, “Add Meeting”, making them clear and easy to understand.

Global “+ Add New” button moved to this section, logically grouped with these actions; can now add tasks, meetings, calls, and more.

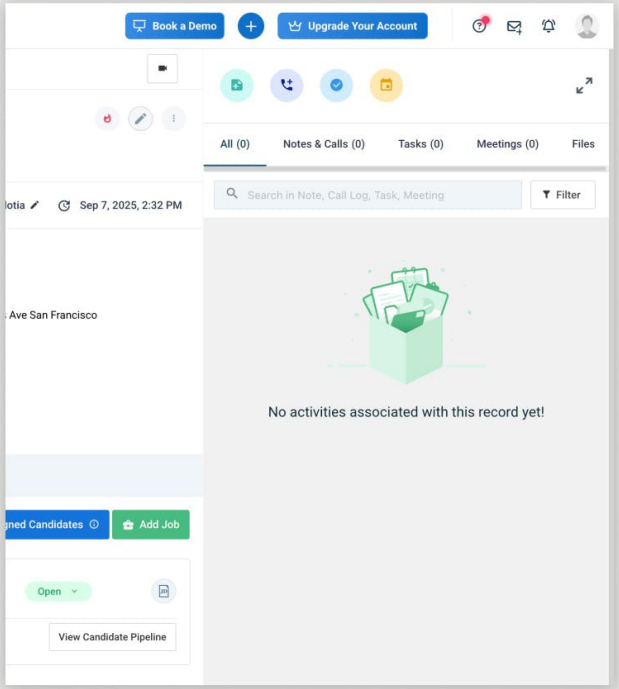

Added a clear “Add Task” button in the right panel, guiding users to take immediate action.

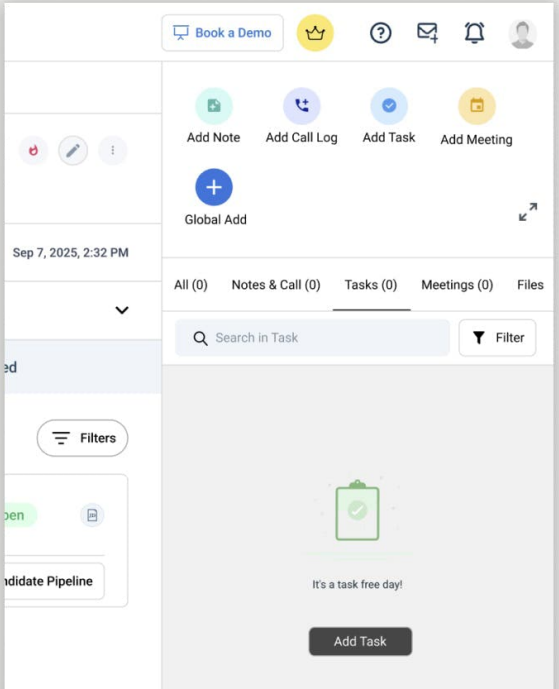

Impact / Effect:

- Users can immediately see and perform key actions.
- Improves clarity, discoverability, and workflow efficiency.
- Groups related actions together, reducing top bar clutter and cognitive load.

OLD

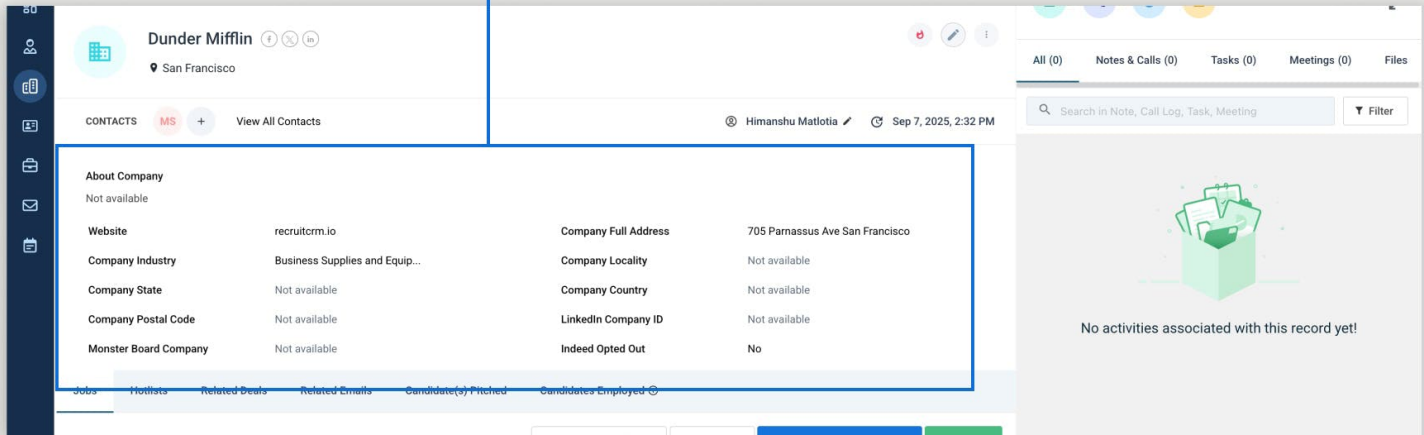

NEW

# Pain Point 3 : Top Bar Buttons Reorganized for Better Workflow Hierarchy

**Old**

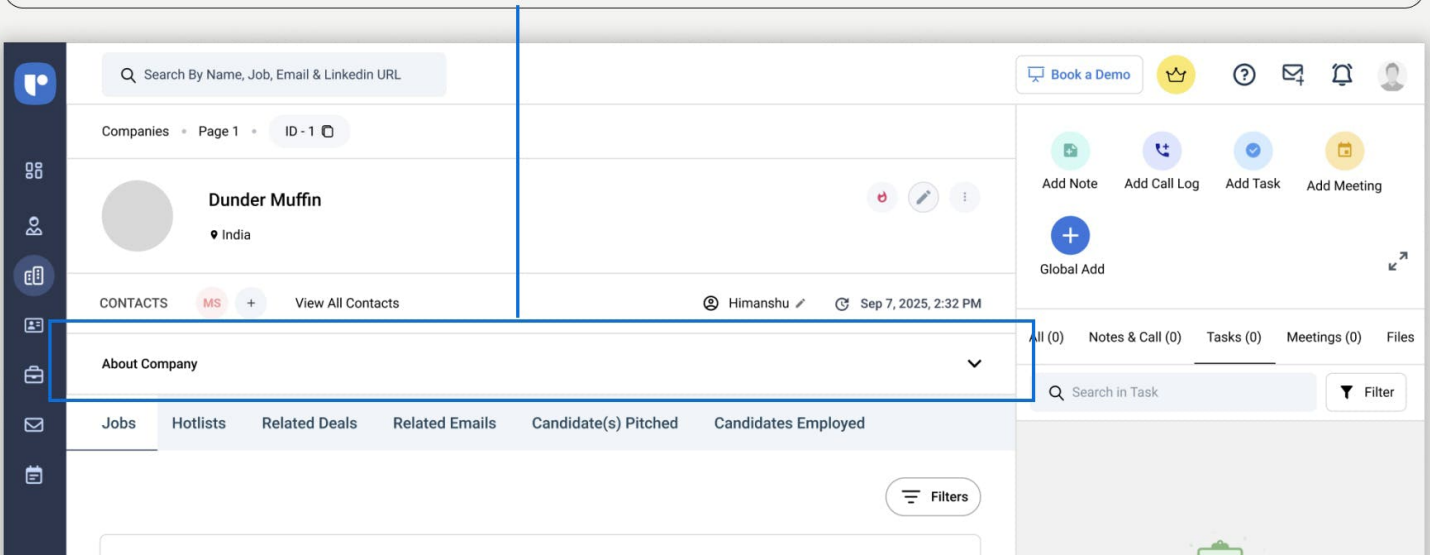

- The About Company section showed many fields (Website, Industry, Address, LinkedIn ID), often empty or filled.
- It was always displayed by default, taking up a lot of space and distracting from the recruiter's main workflow.
- This section is not something a recruiter always needs while managing jobs, tasks, or candidates.

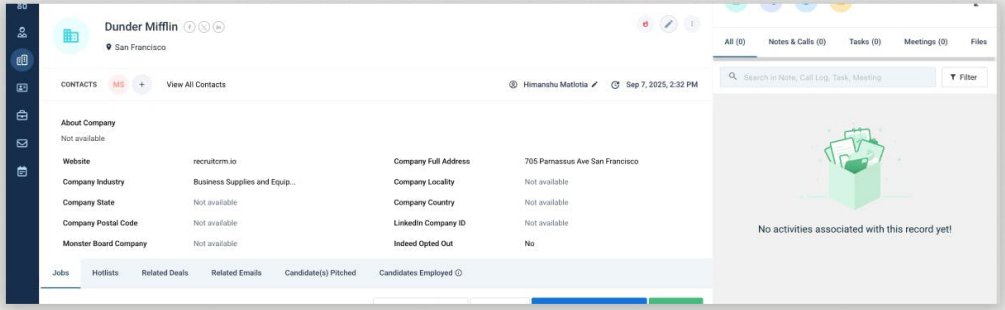

## Pain Point 3 : Top Bar Buttons Reorganized for Better Workflow Hierarchy

NEW

- Made the section collapsible.
- By default, it stays collapsed and shows only important information if the user chooses to expand it.

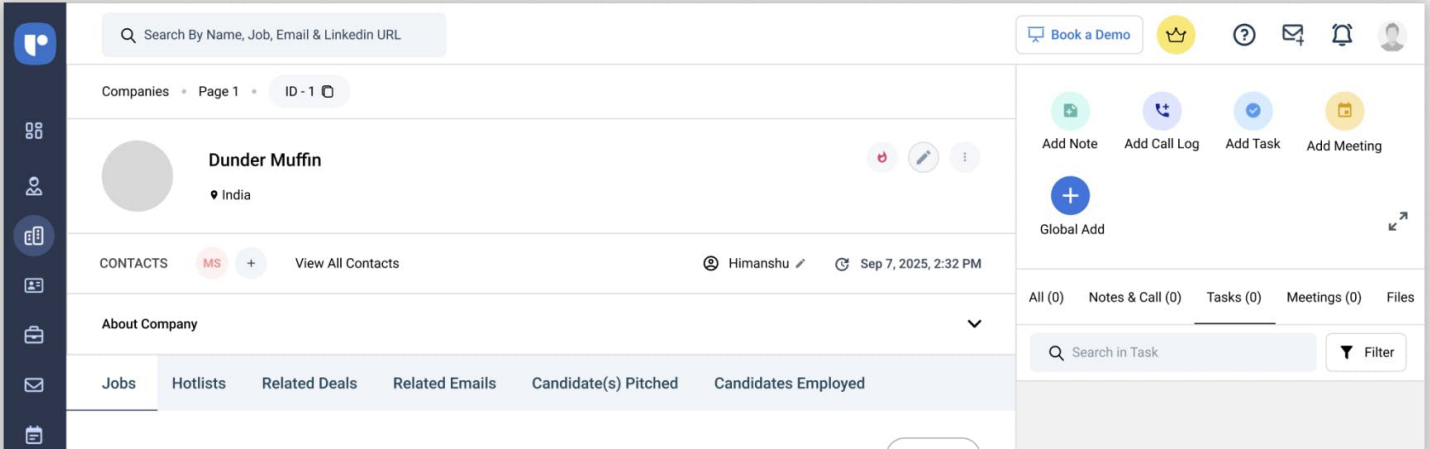

OLD

Impact:

- Clear visual hierarchy guides recruiters to key actions.
- Secondary options remain visible but not distracting.

NEW

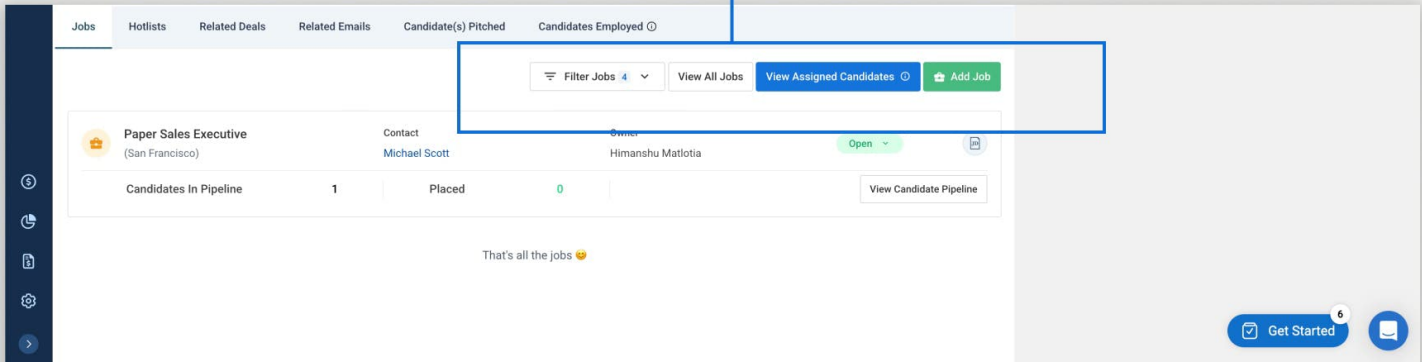

# Pain Point 4 – Hard-to-Find & Poorly Grouped Action Buttons

Old

• The filter button and multiple action buttons (Add Job, View Assigned Candidates, etc.) were all crowded together at the top.

• This made the interface visually cluttered and confusing.

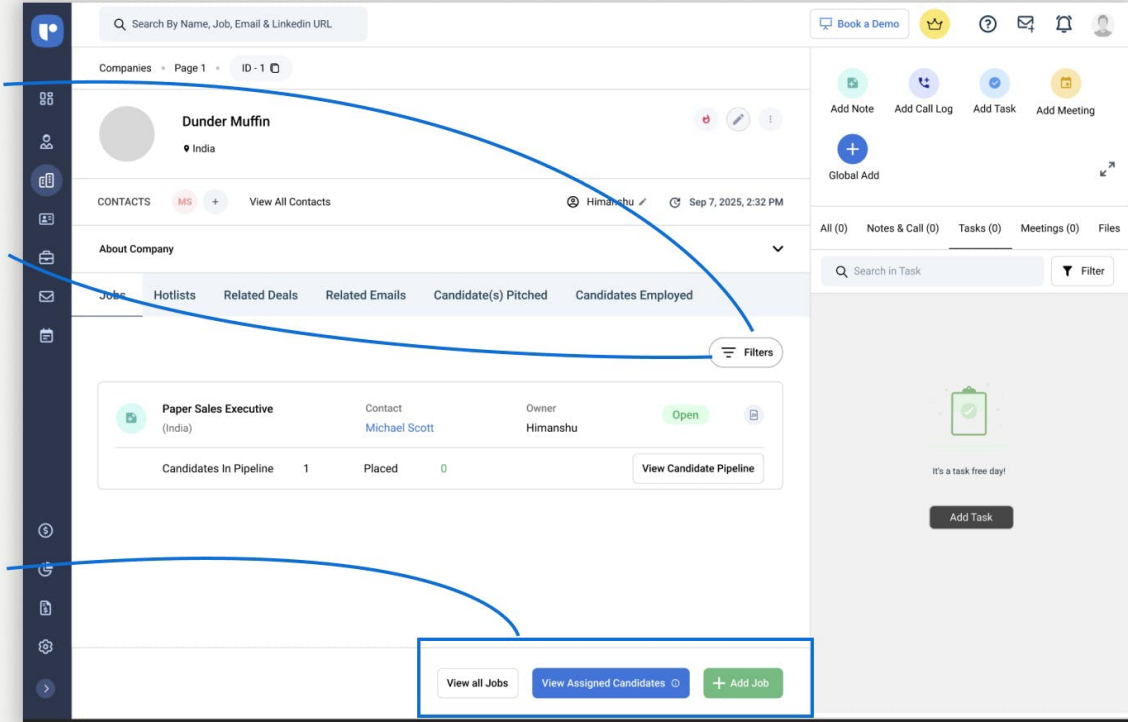

# Pain Point 4 – Hard-to-Find & Poorly Grouped Action Buttons

NEW

Moved the filter button below the Jobs section, grouping it logically with the job list.

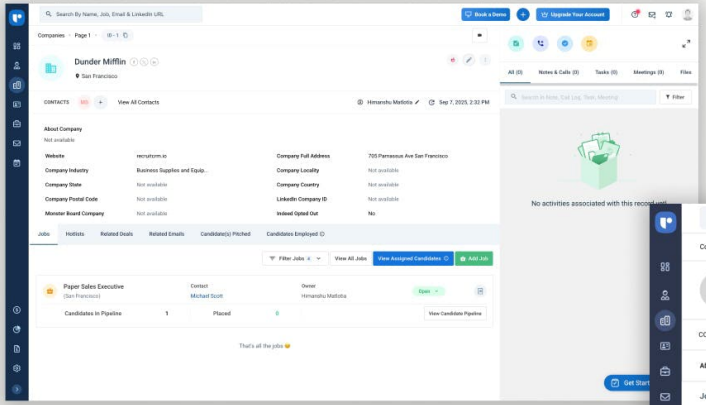

Changed the filter button text from “Filter Jobs” to just “Filter” to make it shorter and cleaner.

The three main action buttons (Add Job, View Assigned Candidates, etc.) are now aligned at the bottom of the section, giving them more space and making them easier to focus on.

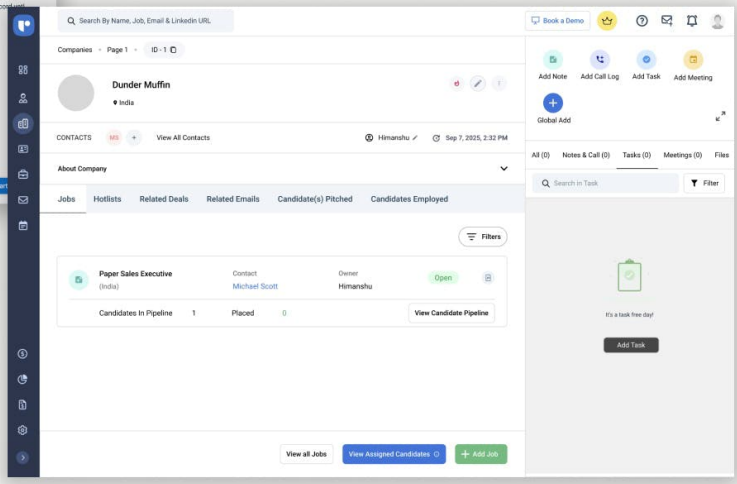

**Impact / Effect:**

- Clearer visual hierarchy helps the user focus on important actions.
- Less clutter and more intuitive grouping improve overall usability.
- Shorter filter button text makes the interface look cleaner and less heavy.

Old

NEW

# FINAL DESIGN

- Collapsible About Company section.
- Filter button moved below jobs & label shortened.
- Action buttons aligned at bottom.
- Clear labels for right panel actions.
- Global “+ Add New” button grouped logically.
- Top bar buttons visually reorganized.
- Cleaner layout, focused workflow.
